The Tenpenny Health Restoration Center is a **wellness facility** focused on improving your circulation. We do not focus on your diagnosis, nor do we treat your disease.

Our **wellness facility**, through the use of ECP Therapy, works to improve the circulation to every organ in your body which in turn, helps restore your physiology and optimal function.

Our team educates, inspires, and motivates you (and your family/support system) to make the right decisions regarding your health. By thinking and choosing differently, and by improving your circulation, your anatomy and physiology can become healthier. You can then live the life you were divinely designed to live.

As a Christian facility, with your permission, we can also pray with you to assist in your emotional and spiritual healing.
